

Editing the Background of a Paint with Light image:

1- Duplicate the background layer, rotate canvas properly using Image- Image rotation (flip horizontal)

2- Darken the shadows of the image with Levels: Image –Adjustments- Levels- move black arrow closer to the center/right side

3- Select the Eyedropper tool -then click on a rich area of background color with mouse (like here)

4- Switch to the brush tool- select the paintbrush (color replacement brush by holding down on the mouse) or plain paintbrush

5- Use this brush to carefully paint over the people or edit the shape of the letter- you may need to adjust the size of the brush for finer details.

6- Crop image & save as a jpeg file
